

Digital Lookbook & Fashion Visual Direction

Development of high-fidelity catalogs for e-commerce

Capsule Collection Presentation: Harmony of 4 Colors This project demonstrates the creation of a minimalist digital showcase for a basic and timeless clothing collection. The main focus was color accuracy (Earth Tones) and realistic textile texture reproduction. We created a clean layout that highlights the fit of the garments and the brand's visual identity, making the purchase decision easier in the digital environment. Ideal for brands seeking a premium positioning with high-quality visuals and technical consistency.

COLEÇÃO | 4 CORES

01. Campaign Layout and Visual Identity. Visual composition focused on the collection's color palette. The layout highlights the harmony between the different tones and establishes the campaign's art direction, combining minimalist typography with high-resolution photography.

COLEÇÃO | 4 CORES

02. Technical Visualization: Silhouette and Proportion. Rendering focused on accurately representing how the garment fits the body. The goal is to ensure that the digital silhouette matches the physical product, giving the customer confidence and reducing the need for constant photoshoots for every new piece.

03. Textile Detailing: Ribbed Knit. Full focus on the raised texture. The rendering technique captures the depth of the knit fibers and the way light interacts with the ribbed surface, creating a tactile and sophisticated visual experience — essential for the premium e-commerce market.

Special Edition: Palette Expansion and Premium Textures

Demonstration of color versatility and textile detailing

Beyond the main collection, we explored variations that highlight the versatility of the digital model.

This slide presents an additional color in ribbed knit, focusing on the rendering of shadows and raised texture in textured fabrics.

It demonstrates the ability to adapt the product to new launches and limited editions quickly and with complete visual consistency, while maintaining the realism of the original fit and lighting.

04. Color Accuracy and Lighting Realism. Demonstration of visual consistency. This close-up highlights the precision of color and shadow transitions, maintaining a high level of realism even in macro enlargements. It is an ideal solution for catalogs that require detailed zoom without loss of quality.
